This build saw a massive update to the Watercolour theme. Being over 100 builds from Beta 1, it contained many changes. The icons were completely different, the start menu was enhanced, the Explorer folder view was further changed, and there were many, many bug fixes.

This build featured another new icon set, as well as a larger start menu than 2410.

This was not that much of a change from 2416, except for 2 things: 1, the start menu was bloated even further than it already was, and 2, this was the first build containing Windows Product Activation. This was the last build to contain the Watercolour theme.

2465
The first interim after Beta 2, and probably the buggiest as well. This contained a new background wallpaper set, and the UI said Windows XP in many places instead of Whistler for the first time. However, it caused problems with certain programs, including Office XP, and was generally unstable.

This was the first build that was very hard to crack. Well, no, not hard: impossible. There was never a true crack for this build. The Reset workaround was developed for this build. Direct3D didn't work in 2469 either, so this was a very unpopular build.

Windows XP
5.10.2475
Beta 2
